ETHAN PARK

Occupational Therapist, OTR/L | Inpatient Rehabilitation (Neuro)

ethan.park@example.com · (555) 018-5562 · Portland, OR, US

SUMMARY

Occupational therapist (OTR/L) with 7 years of experience in inpatient rehabilitation and acute care. Treat 7–8 patients per day after stroke, brain injury, and spinal cord injury in a 60-bed rehabilitation hospital. Raised the average Section GG self-care gain for stroke patients from 10.2 to 12.6 points. Certified Brain Injury Specialist (CBIS); fieldwork educator for 5 Level II students.

EXPERIENCE

Occupational Therapist II, Inpatient Rehabilitation — ***Northline Rehabilitation Hospital*** Apr 2022–Present

60-bed inpatient rehabilitation hospital with stroke, brain injury, and spinal cord injury programs.

- Evaluate and treat 7–8 patients per day; write self-care, transfer, and community goals with each patient and family.
- Added a daily morning self-care session on the stroke unit; the average Section GG self-care gain rose from 10.2 to 12.6 points in 12 months.
- Fabricate 4–6 custom resting hand and wrist orthoses per month and teach wear schedules to patients and nurses.
- Train caregivers and complete home safety assessments for about 85% of patients who go home; order adaptive equipment before discharge.
- Supervise 2 certified occupational therapy assistants (COTAs); precepted 5 Level II fieldwork students through 12-week placements, and all 5 passed.

Occupational Therapist, Acute Care — ***Mercer Valley Medical Center*** Sept 2019–Mar 2022

320-bed community hospital; covered medical, surgical, orthopedic, and intensive care units.

- Evaluated and treated 9–11 patients per day and gave discharge recommendations to the care team within 24 hours of the order.
- Joined the intensive care unit (ICU) early mobility team; patients on the protocol started self-care tasks 2 days earlier on average.
- Screened 15–20 patients per week with the Montreal Cognitive Assessment (MoCA) and reported safety risks before discharge.
- Taught a hip precautions class to 6–8 joint replacement patients per week; satisfaction with discharge teaching rose from 81% to 90%.
